

**IN THE CLAIMS:**

This listing of claims will replace all prior versions, and listings, of claims in the application:

---

1. (Currently amended) A view finder comprising:  
an organic EL display element; ~~and~~  
~~an~~ a first optical element for magnifying an image of an object displayed on said organic EL  
display element[[]]; and  
a second optical element having a surface on which the image is reflected.

2. (Previously presented) A view finder according to claim 1 wherein said organic EL display element comprises plural thin film transistors formed over a substrate.

3. (Previously presented) A view finder according to claim 1 wherein said organic EL display element comprises a pixel portion and a driver circuit formed over a substrate.

4. (Original) A view finder according to claim 1 wherein said view finder is incorporated into a camera selected from the group consisting of a video camera and a digital camera.

5. (Currently amended) A view finder comprising:  
an organic EL display element; and  
a plurality of optical elements for magnifying an image of an object displayed on said organic EL display element[[]],  
wherein at least one of said optical elements has a surface on which the image is reflected.

6. (Previously presented) A view finder according to claim 5 wherein said organic EL display element comprises plural thin film transistors formed over a substrate.

7. (Previously presented) A view finder according to claim 5 wherein said organic EL display element comprises a pixel portion and a driver circuit formed over a substrate.

8. (Original) A view finder according to claim 5 wherein said view finder is incorporated into a camera selected from the group consisting of a video camera and a digital camera.

9. (Currently amended) A view finder comprising:  
an organic EL display element; ~~and~~  
~~an~~ a first optical element for magnifying an image of an object displayed on said organic EL display element and projecting it upon an eye of a user[.]; and  
a second optical element having a surface on which the image is reflected.

10. (Previously presented) A view finder according to claim 9 wherein said organic EL display element comprises plural thin film transistors formed over a substrate.

11. (Previously presented) A view finder according to claim 9 wherein said organic EL display element comprises a pixel portion and a driver circuit formed over a substrate.

12. (Original) A view finder according to claim 9 wherein said view finder is incorporated

into a camera selected from the group consisting of a video camera and a digital camera.

13. (Currently amended) A view finder comprising:

an organic EL display element; and

a plurality of optical elements for magnifying an image of an object displayed on said organic EL display element and projecting it upon an eye of a user[[]],

wherein at least one of said optical element has a surface on which the image is reflected.

14. (Previously presented) A view finder according to claim 13 wherein said organic EL display element comprises plural thin film transistors formed over a substrate.

15. (Previously presented) A view finder according to claim 13 wherein organic EL display element comprises a pixel portion and a driver circuit formed over a substrate.

16. (Original) A view finder according to claim 13 wherein said view finder is incorporated into a camera selected from the group consisting of a video camera and a digital camera.
